INTRODUCTION

Gulf Crete

- ▶ Gulf Crete Contracting LTD. Is a specialized contracting company that comprises shareholders with a combined experience of 30 years in the Construction industry. Its main principal owner is a 2nd Classification Contractor that has been in business since 1979 in the Saudi Arabian Market for Civil, Electromechanical & Architectural works. In 2008 the General Contracting Company saw the need for a specialized division focusing on Fire Proofing, Water Proofing, Concrete Repair & Restoration, Specialty Floor Coatings, and Maintenance Repair & Operations. This division flourished with success and in 2014 it was unanimously decided by all shareholders to separate the division as its own stand-alone entity.

Mission

To deliver a premier company in the Jordanian Market delivering innovative services, out-of-the-box thinking, and advanced technologies based on an in-depth understanding & market analysis in the field of fireproofing, water proofing, concrete repair & restoration, specialty flooring & MRO. Gerziem Management is dedicated to being a company admired for its excellence in providing creative approaches, superior advice, and executions capabilities by its clients, shareholders, suppliers, and employees

Vision

To become the market leader in our industry by utilizing innovation, technology, state of the art equipment & materials and key human resource elements while delivering top class quality service while being conscious of the clients bottom line needs in the Jordanian Market

Core Value

Our Core values will shape the culture and define the character of our company, guiding how we behave and make decisions. Put our client's interest ahead of our own: This means we deliver more than is expected. It doesn't simply mean we do whatever the client asks Integrity: Exciting trust by taking accountability, acting ethically and promoting open forms of communication between all individuals at all levels Best people: Attracting, training, and developing the best talent in our industry and encouraging a "can do" attitude. Client Value Creation: Improving our client's business through performance, long-term win-win scenarios and focusing on execution excellence

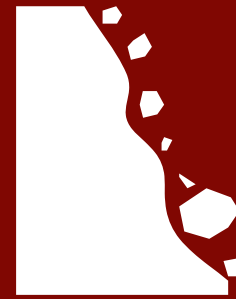

The background of the entire image is a composite. The top half shows the back of a person wearing a white long-sleeved shirt and a high-visibility safety vest with yellow and red reflective stripes. The bottom half shows a hand holding a rolled-up white blueprint. The background is a high-angle, wide shot of a dense cityscape with many skyscrapers and buildings under a clear sky.

Concrete Repair/Restoration & Strengthening

A leader in its field - GCL offers comprehensive engineering solutions, technical assistance, and quality applications for concrete repair, flooring repairs, and structural concrete. In addition, GCL provides the design and implementation of structural strengthening systems using Fiber Reinforced Polymer (FRP). Our experience and expertise combine specialized and conventional concrete repair methods to provide the most practical solution for all concrete repair projects.

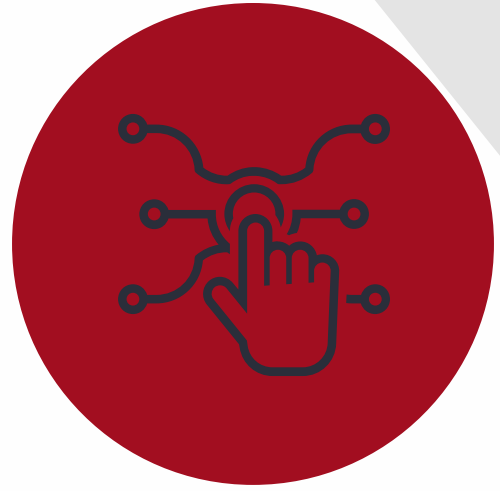

RockFall Protection

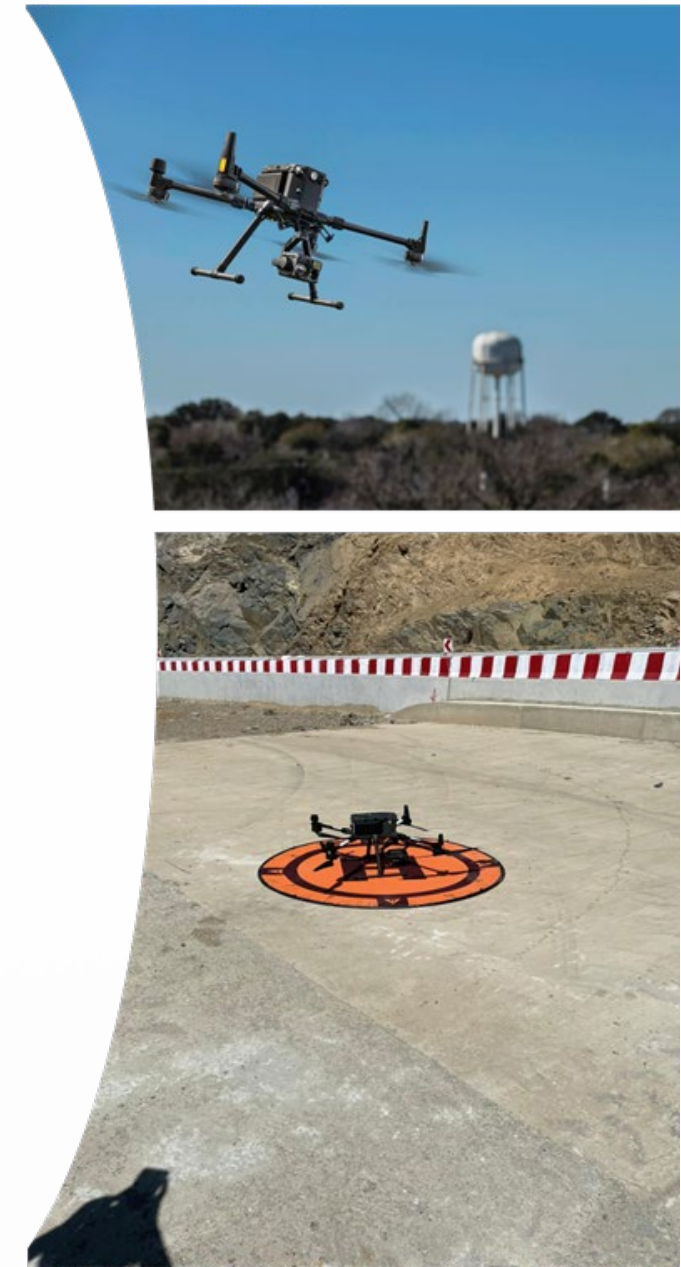

During the last decades, large rock falls occurred on the steep slopes along mountainous areas of Saudi Arabia, causing serious damage to buildings and traffic facilities, injury to people, and delayed traffic on roads. Settlements, and transportation facilities in mountainous areas with steep rock slopes are vulnerable to rock falls. In recent years, a number of highways have been or are scheduled to be built in the southern region of Saudi Arabia, that carry significant risk of increasing rock fall hazard events. GCL offers comprehensive engineering solutions, technical assistance, and quality applications for rockfall protection.

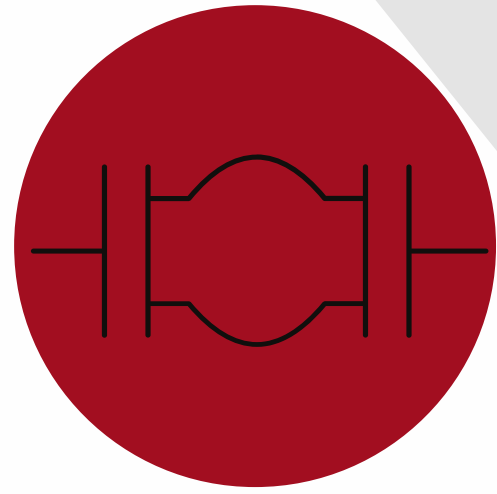

Survey Technology

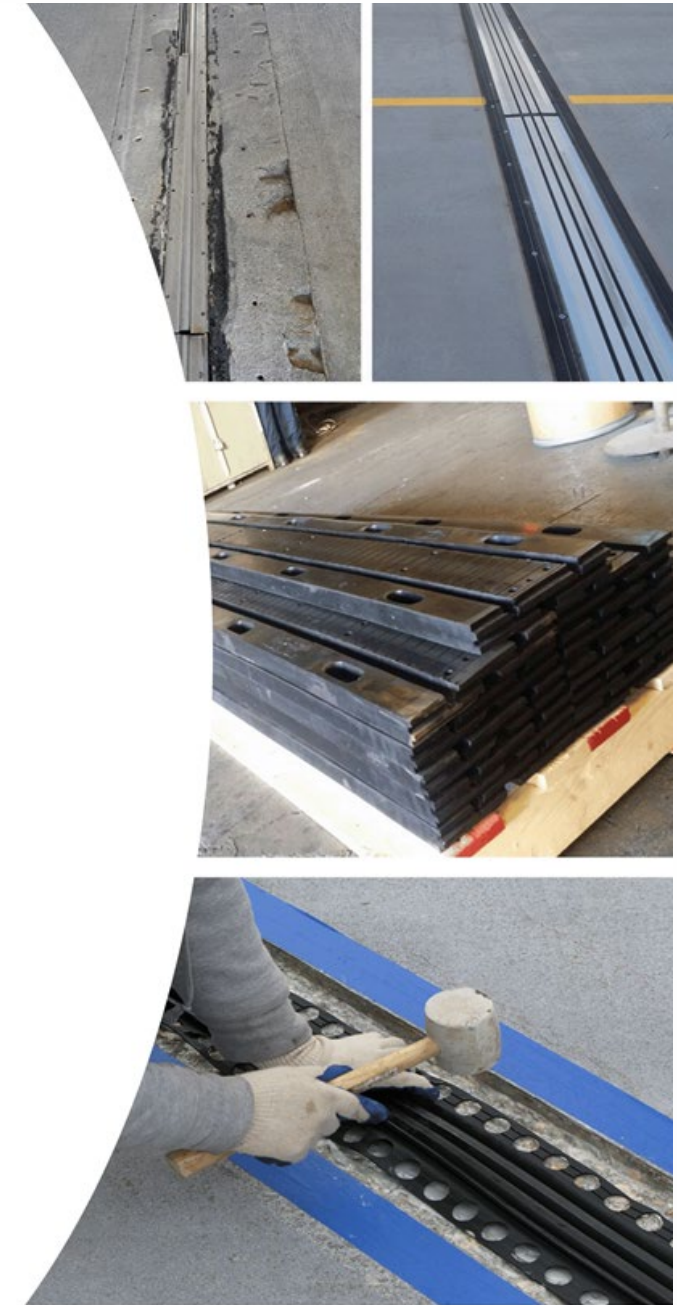

During the past 50 years, surveying and engineering measurement technology has made five quantum leaps: the electronic distance meter, total station, GPS, robotic total station, and laser scanner. Aircraft systems or drones will be the sixth quantum leap in technology. Surveying with a drone offers enormous potential to GIS professionals. With a drone, it is possible to carry out topographic surveys of the same quality as the highly accurate measurements collected by traditional methods, but in a fraction of the time. This substantially reduces the cost of a site survey and the workload of specialists in the field. GCL Provides all these services.

Expansion joint

Expansion joints are designed to allow for continuous traffic between structures while accommodating movement, shrinkage, and temperature variations on reinforced and prestressed concrete, composite, and steel structures. They stop the bridge from bending out of place in extreme conditions and also allow enough vertical movement to permit bearing replacement without the need to dismantle the bridge expansion joint. GCL has expertise and experience in such applications.

Fire Proofing

GCL specializes in commercial fireproofing, thermal and acoustical insulation, and firestop services. We adhere to industry standards and provide quality services at reasonable prices. We will examine the situation closely whether it's a new install or retrofit remodel project and work together with you to achieve the desired solution. Timelines are crucial in commercial construction, and it is our goal to help keep your projects moving, so constant coordination is very important to us.

Vertical & Horizontal Protective and Decorative Coatings

Protective coatings are given to concrete surfaces to prevent damage and for a rehabilitated look. GCL co. supplies and applies a wide range of protective coatings. Appropriate protective coating materials are recommended by experienced Engineers from GCL Co. to provide quality solutions. Epoxy resins, non-slip coatings, polyurethanes, cementations coatings, acrylic coatings, membranes, food grade systems, tanking/waterproofing, and chemical-resistant coatings. GCL offers decorative flooring solutions that give a new look to an old concrete floor. Decorative coatings are a perfect alternative to concrete replacement, tiles, resin floors, and other topical systems. Decorative floors include acid staining, densifying, impregnated sealers & polished concrete, Creative & flexible designs are created with logos saw cuts, aggregate & decorative saw cuts. Specialty grinding machines can be helpful in a way to provide the required preparation of the concrete substrate for proper levels, mechanical bonding, and decorative work.

Water Proofing

Waterproofing is necessary in any kind of environment, but especially in areas with heavy moisture. In areas where there is a lot of moisture collection on the ground, hydrostatic pressure can create a nightmare for a building's foundation. Whether it's waterproofing or damp proofing, our experts here at GCL know the jeopardy that inferior waterproofing puts a structure in, and they strive to mitigate any issues with superior knowledge and experience. We carefully select premium quality products to best match the requirements and our installers are highly trained and qualified.

- ✓ Waterproofing
- ✓ Dampproofing
- ✓ Site Caulking
- ✓ Tilt Wall Panel

- ✓ Caulking Water Repellants
- ✓ Below Grade
- ✓ Waterproofing Deck Coatings

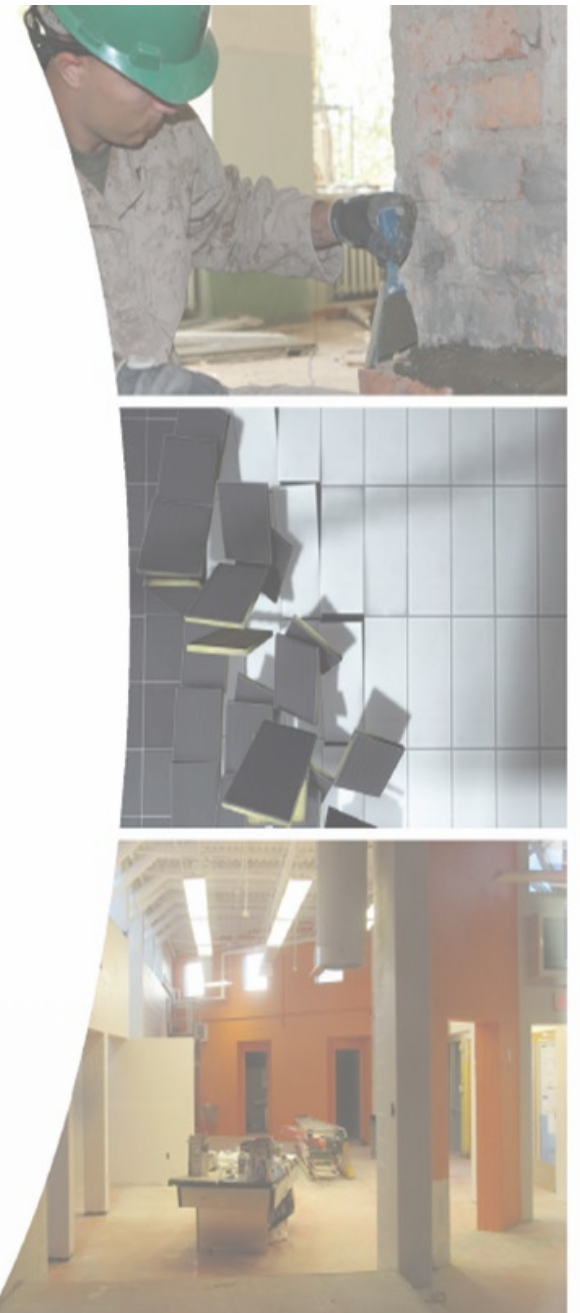

- ✓ Window Caulking
- ✓ Floor Sealers
- ✓ Traffic Coatings

Renovation & Fit Out

GCL carries out exceptional commercial and residential property refurbishments and renovations. we fit out precision interiors; we develop client relationships based on mutual trust and understanding and are open to our client's objectives. With our vast global relationship with material suppliers of paints, wood, doors, furniture & fixtures. GCL can provide you with a total turnkey solution. Whether it's a listed building renovation, retail fit-out, or office fit-out, we apply our stringent management control procedures to guarantee the highest standard of finish and defect-free handover, irrespective of the demands of the contract programmed. We are solid and reliable, and we exceed client expectations.

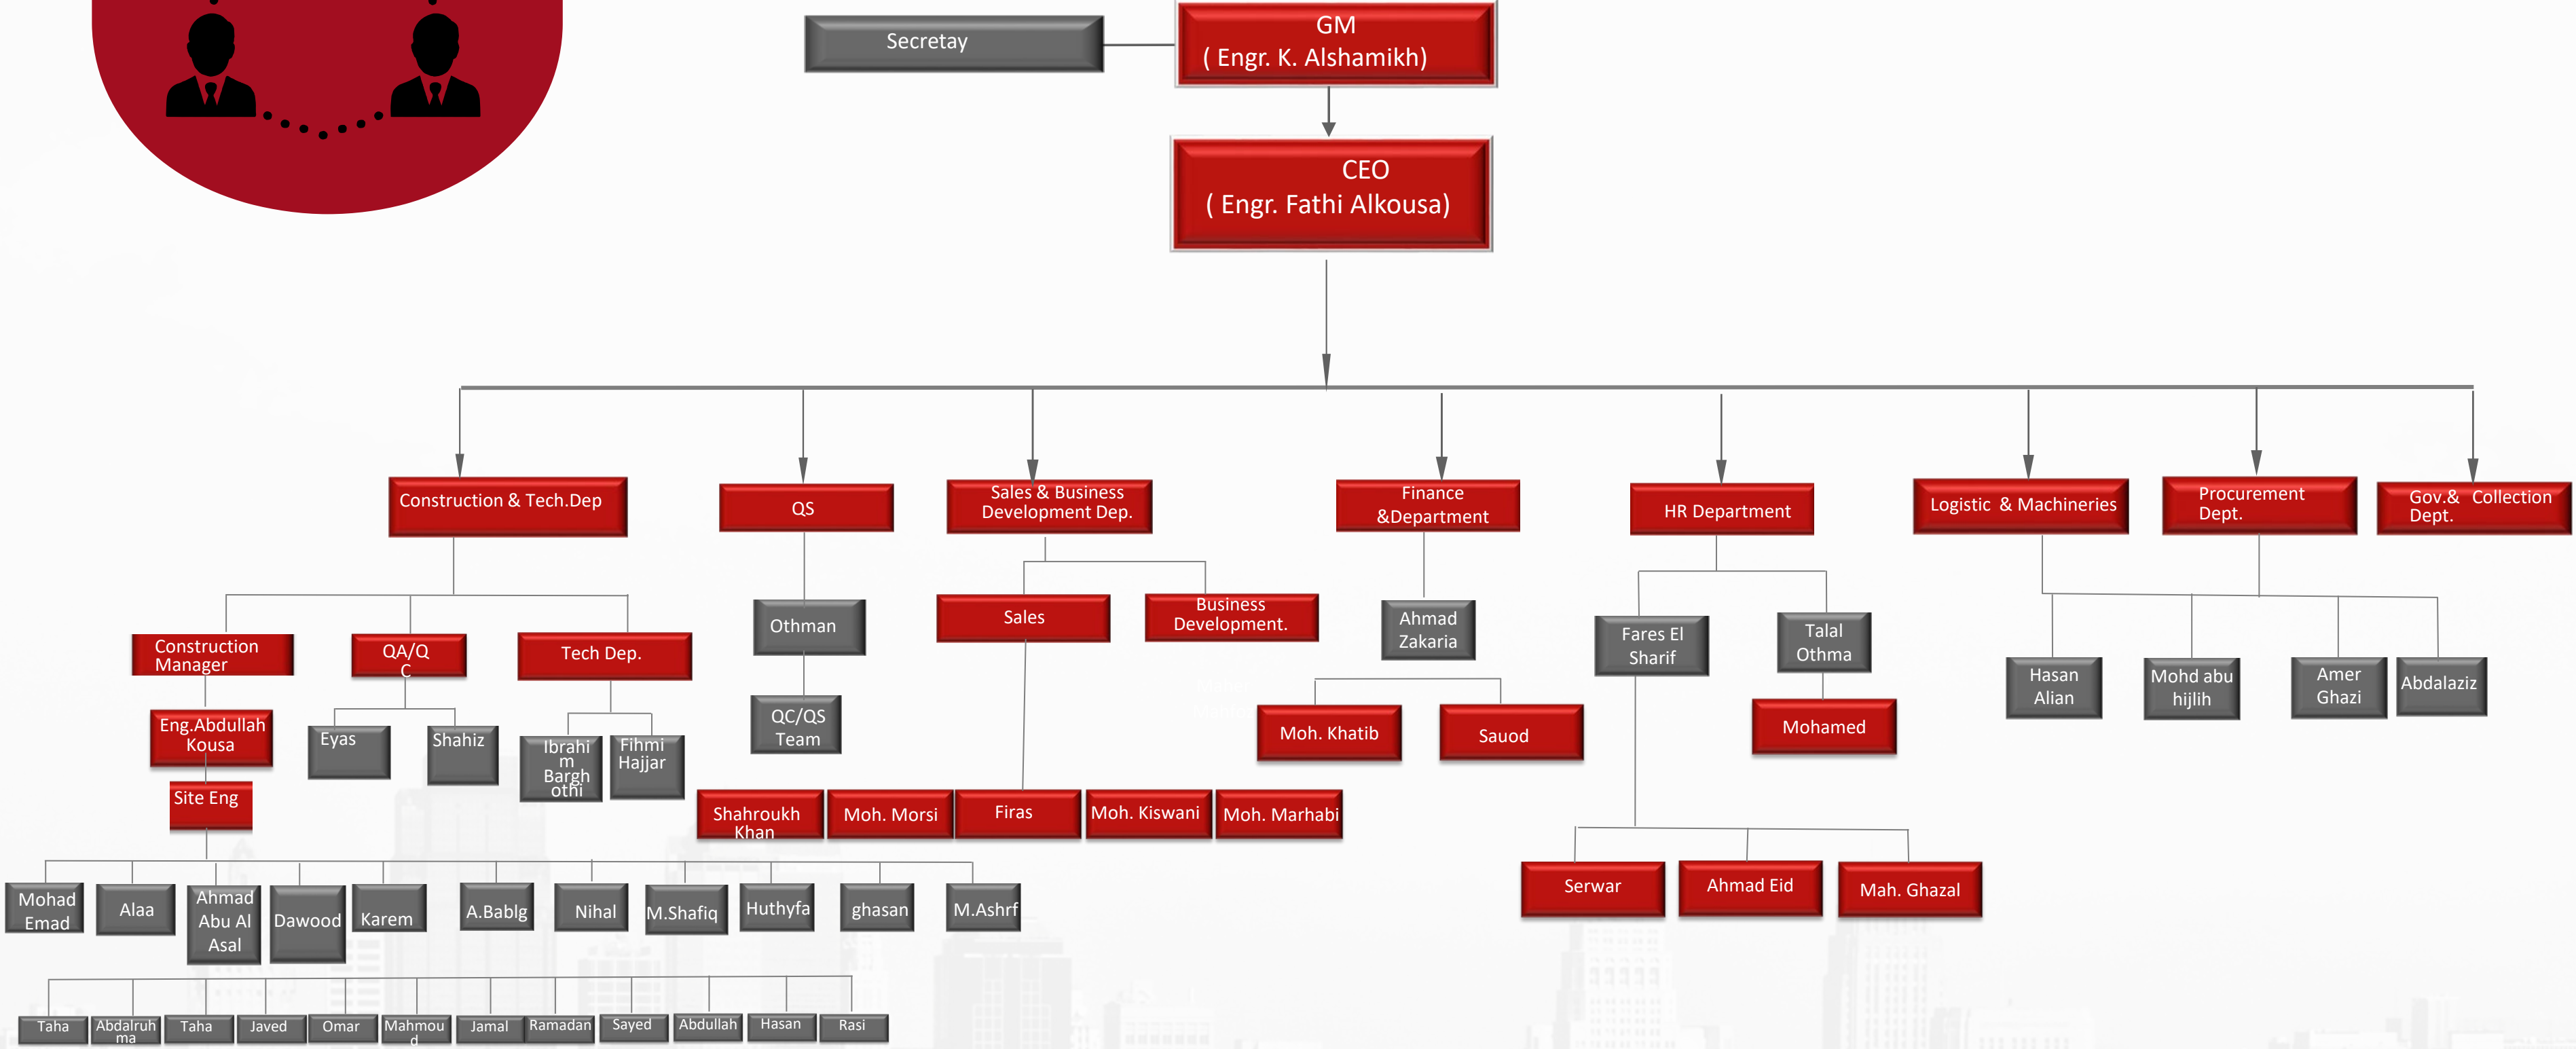

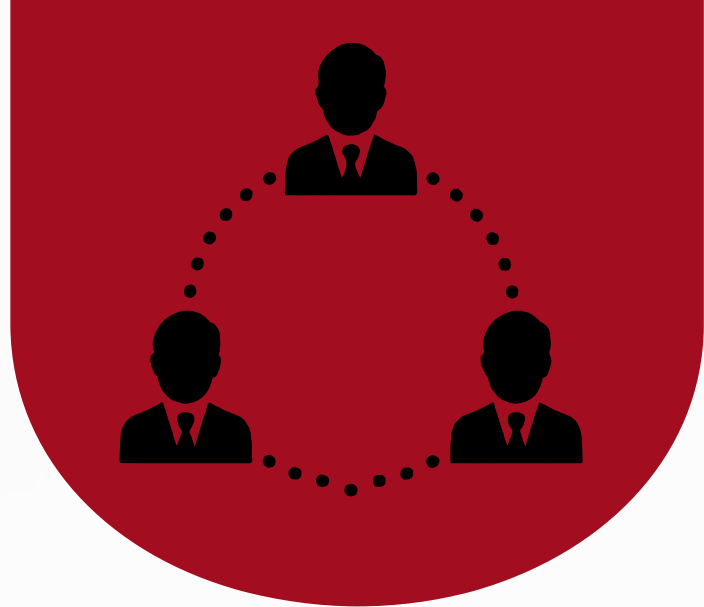

ORGANIZATION CHART

Organization Chart

HUMAN RESOURCES

Our Human Resources

GCL classifies all its employees as Team members as they are all contributing to the process of producing goods or providing services. All the engineering staff, technicians, and team members are trained, and educated in new processes, materials, safety procedures, and tools, which helps in maintaining the highest level of quality, the company has >100 skilled and unskilled team members in addition to the engineering and foreman whom are experts in their field with high efficiency.

WORK TARGET AREAS & MARKET POSITION

Work Target Area

MAIN CONTRACTORS PROJECT

Initial condition surveys, concrete & steel repairs, Waterproofing & roofing works, joint sealants, specialist coatings.

BUILDINGS

Initial condition surveys, concrete & steel repairs, Waterproofing & roofing works, joint sealants, specialist coatings.

CONCRETE REPAIR

Leaking, repairing damaged concrete, strengthening, and restoration.

Work Target Area

WATER INDUSTRY STRUCTURES

Renovation services, condition surveys, tank linings, leak sealing, reservoir roof lining, concrete repairs, and protective coating.

ROADS AND BRIDGES

Survey, repair, restoration, and strengthening of concrete, steel, and cast-iron structures, new bearing replacements, expansion jointing, and post-tensioning and advising to ensure that work is carried out correctly and safely.

GOVERNMENT INDUSTRY STRUCTURES

Renovation services, condition surveys, tank linings, leak sealing, reservoir roof lining, concrete repairs, and protective coating.

Activities

Structural Activities

- ✓ Structural and Cosmetic Repair System
- ✓ Design and Implementation of Structural
- ✓ Strengthening and Conventional System
- ✓ Concrete Injection System
- ✓ Water Tanks Treatment and Repairs.
- ✓ Repair and protection of Retaining Walls and Bridges.
- ✓ Carbon Fiber Strengthen (CFRP)
- ✓ Reinforced Shot Creating for Earth collapse
- ✓ Cathodic Protection
- ✓ Form & Pump Repair System
- ✓ Anchoring
- ✓ Micro Piles
- ✓ Soil Stabilization
- ✓ Soil Stabilization
- ✓ Soil Injection Reinforced
- ✓ Concrete jacketing

Rock Fall Protection

Survey Technology

- ✓ Rock Bolts Anchorage
- ✓ Sup - Horizontal Drain
- ✓ Shotcrete Application
- ✓ Dynamic Rock Fall Barriers
- ✓ Wire Mesh Ring Netting

- ✓ The electronic distance meter
- ✓ Total station
- ✓ GPS
- ✓ Robotic total station
- ✓ Laser scanner
- ✓ Aircraft systems or drones

Industrial Flooring

Coating Activities

- ✓ Floor Epoxy Resin Coating
- ✓ Floor Traffic Deck Coating
- ✓ Epoxy Self Leveling specially for SCECO buildings
- ✓ Cementitious material Coating. Expansion and Construction Joints Treatment.
- ✓ Bridge Painting
- ✓ Epoxy screed repair

- ✓ Polyurethane Screed (such as U-Crete)
- ✓ Cementitious self leveling Anti- Static Flooring
- ✓ Any other industrial Flooring Micro topping Flooring Coating
- ✓ Heavy Grinding for Floor Concrete Epoxy Terra zzo Finishing

Water Proofing

- ✓ Foam Concrete Work
- ✓ Bituminate Water Proofing Membrane (APP & SBS)
- ✓ PVC Water Proofing Membrane
- ✓ EPDM Water Proofing membrane
- ✓ HDPE Water proofing membrane
- ✓ TPO Water proofing Membrane
- ✓ Compartment Water proofing System
- ✓ Water Tanks Lining System
- ✓ Epoxy Coating
- ✓ Cementitious Coating
- ✓ Crystalline Coating
- ✓ Polysulfide Coating
- ✓ Polyurethane coating
- ✓ Steel Tanks Epoxy & Polyurethane Coating

الموضوع: طلب تاهيل لاعمال فواصل التمدد بالجسور

المحترمين

السادة شركة خليج الخرسانة المحدودة
(٧٠٦٠ طريق الملك عبدالعزيز - المروج | الرياض ١٢٢٨٢ - ٤٥١٣)

السلام عليكم ورحمة الله وبركاته

إشارة لخطابكم المقيد لدينا برقم ٥٩١٢٧ وتاريخ ١٤٤٢/٨/١٠هـ، وإشارة لخطابكم المقيد لدينا برقم ١٦١٢٤ بتاريخ ١٤٤٢/٠٣/٠١هـ بخصوص طلب اعتماد وتأهيل شركتكم (شركة خليج الخرسانة المحدودة) كمقاول باطن بمشاريع تشغيل وصيانة ونظافة طرق المملكة بوزارة النقل، وبعد الإطلاع على المرفقات ودراسة الأوراق الثبوتية والجهاز الفني وخبرات الشركة وأعمالها السابقة، نفيديكم بأنه لا مانع لدينا من تأهيلكم كمقاول باطن معتمد لدى وزارة النقل لتنفيذ الأعمال الآتية:

1. تنفيذ وتركيب فواصل التمدد للجسور بأنواعها.
2. أعمال إصلاح وحماية الخرسانة وحقن ومعالجة الشروخ الانشائية وغير الانشائية.
3. تنفيذ أعمال العزل المائي والدهانات المضادة للكربنة (Anti-carbonation).
4. أعمال التدعيم باستخدام سرائح الكربون فايبر والقمصان المعدنية.
5. أعمال حقن التربة وتثبيت التربة بالخرسانة المقذوفة والخوازيق الأبرية.
6. أعمال الحماية الكاثودية للعناصر الانشائية.

وذلك اعتباراً من تاريخ خطابنا هذا ولمدة (سنة واحدة) شريطة إلتزامكم بالموصفات العامة للوزارة، علماً أنه في حالة عدم إلتزامكم بالموصفات فإنه سيتم وبدون سابق إنذار إلغاء اعتمادكم.

وتقبلوا أطيبي تحياتي...

 Sent Monday, 20 December 2021

MESSAGE

Gentlemen,

In regard to rock fencing, specification 10-136000-0000100595-ACM-TNL-SPC-000009 SECTION 313326 -- ROCK SLOPE WIRE MESH, PART 1 GENERAL, Section 1.1 B.2 and B.4 state:

2. Complete the Detailed Design, manufacture, supply, install and warrant the work, complying with the specified design and performance requirements."

4. Where a particular material, product or supplier is specified, the material, product or supplier shall be deemed indicative representing the Employer's Representative's Design Intent only. Complete the installation using the specified or other product acceptable to the Employer's Representative. Be fully responsible for the Detailed Design and performance of the work.

Also, Section 2.2 indicates: "Rockfall wire mesh shall be flexible nominal TECCO G65/3 high tensile mesh or similar. Components shall have Geobrugg "Ultracoat" corrosion protection or similar corrosion protection and shall not be coated PVC." And IFC plan sheet 10-136000-0000100595-ACM-TNL-DRG-500061 includes an indicative arrangement for rockfall fencing and states: "ROCKFALL FENCE GEOBRUGG GBE-3000A 6m HIGH 3000 kJ CAPACITY OR SIMILAR APPROVED. ROCKFALL FENCE DETAILS AND INSTALLATION TO BE IN ACCORDANCE WITH MANUFACTURER'S REQUIREMENTS" and "LOCATION, ARRANGEMENT, SIZE AND CAPACITY MAY VARY IN RESPONSE TO ROCK SLOPE MAPPING."

Accordingly, the contractor may use G80/4 wire mesh in compliance with the manufacturer's recommendation to achieve the performance requirements (3000kJ) for the rockfall protection system that the contractor has designed, will install, and will warrant.

Thanks.

CERTIFICATION

HEMPEL PAINTS (SAUDI ARABIA) W.L.L. recommends **GULF CRETE LTD.** as an approved Hempel Paints Applicator for the application of its products for both Decorative and Epoxy painting.

Through regular supervision and inspections from the period of two years Hempel Paints has found **GULF CRETE LTD.** be both professional and competent in application of Hempel Paints. They have proven their capability in successfully completing a large number of projects including commercial complexes and single villa projects.

This recommendation is valid for 12 months and will be subject to review on **13 NOVEMBER 2018.**

Furthermore, this recommendation is made by Hempel Paints without prejudice and/or legal liability of whatsoever kind of Hempel Paints.

Yours faithfully,
 For HEMPEL PAINTS (SAUDI ARABIA W.L.L.)

 Ibrahim El Shalkamy
 Branch Manager
 Central Region

CERTIFICATION

APPROVED APPLICATOR CERTIFICATE

GULF CRETE CO.

This is to advise that, **M/S GULF CRETE CO.** has been registered as an approved applicator and the company demonstrated competence in applying the following Master Builders Solutions Saudi Arabia product/s range below:

- » Epoxy & PU Flooring Systems

Dated: 15th June 2015

To whom it may concern,

This is to certify that M/S Gulf Crete is working at Centro Riyadh Hotel project under SCC supervision for water proofing & epoxy coating with the satisfaction of SCC site management.

Moreover, we are satisfied with the method of statement and standard of work done at site & comply with the specification of work.

We wish them all success in future.

Thank you and best regards,

Eng. Nicolas Haddad
SCC Project Manager
Centro Riyadh Hotel project.

M/s. GULF CRETE

PRE – QUALIFICATION CERTIFICATE OF CONFORMITY

This is to certify that M/s GULF CRETE had worked with Saudi BASF range of products with the following product groups:

- Epoxy & PU Flooring systems
- Waterproofing systems
- Concrete repair

Their Team of supervisor had so far demonstrated good quality work in application and workmanship. Hence, they are granted as pre-qualified applicator for the Saudi BASF range of products as described above.

This pre-qualification is valid for one year from this date and subject to remain under constant monitoring for using Saudi BASF - The Chemical Company products. This pre-qualification can be withdrawn during the duration of this period, if the quality of application is not to BASF's Standards and Guidelines.

CERTIFICATION

CERTIFICATE

FOR RECOMMENDED SIKA APPLICATORS

This is to certify that

GULF CRETE CONTRACTING

Has successfully executed many Projects after having passed the application training of various Sika systems and is Recommended Sika Applicator for

Concrete repair and protection, Waterproofing (PVC membranes loose laid and full comparmet system), Cementitious, Resins, Combiflex range), Joint Sealants and Industrial flooring.

This comprehensive training consisted of practical instructions about proper storage, preparation and application of Sika products.

The recommended applicator has been provided with the relevant Sika Product Data Sheets and all other technical documentation.

This confirmation is valid until the date of expiry below and may be renewed subject to the Recommended Applicator successfully completing any training courses required by Sika. The Recommended Applicator is responsible for ensuring full compliance by its employees with Sika's guidelines, training instructions and any other requirements of third parties.

Sika is not responsible for any loss or damage suffered by any third party as a result of any acts or omissions of the Recommended Applicator arising in anyway, including but not limited to breach of contract, misrepresentation, failure to comply with applicable laws or any other tort including negligence.

Sika Saudi Arabia,

CERTIFICATION

Dated: 15th June 2015

To whom it may concern,

This is to certify that M/S Gulf Crete is working at Centro Riyadh Hotel project under SCC supervision for water proofing & epoxy coating with the satisfaction of SCC site management.

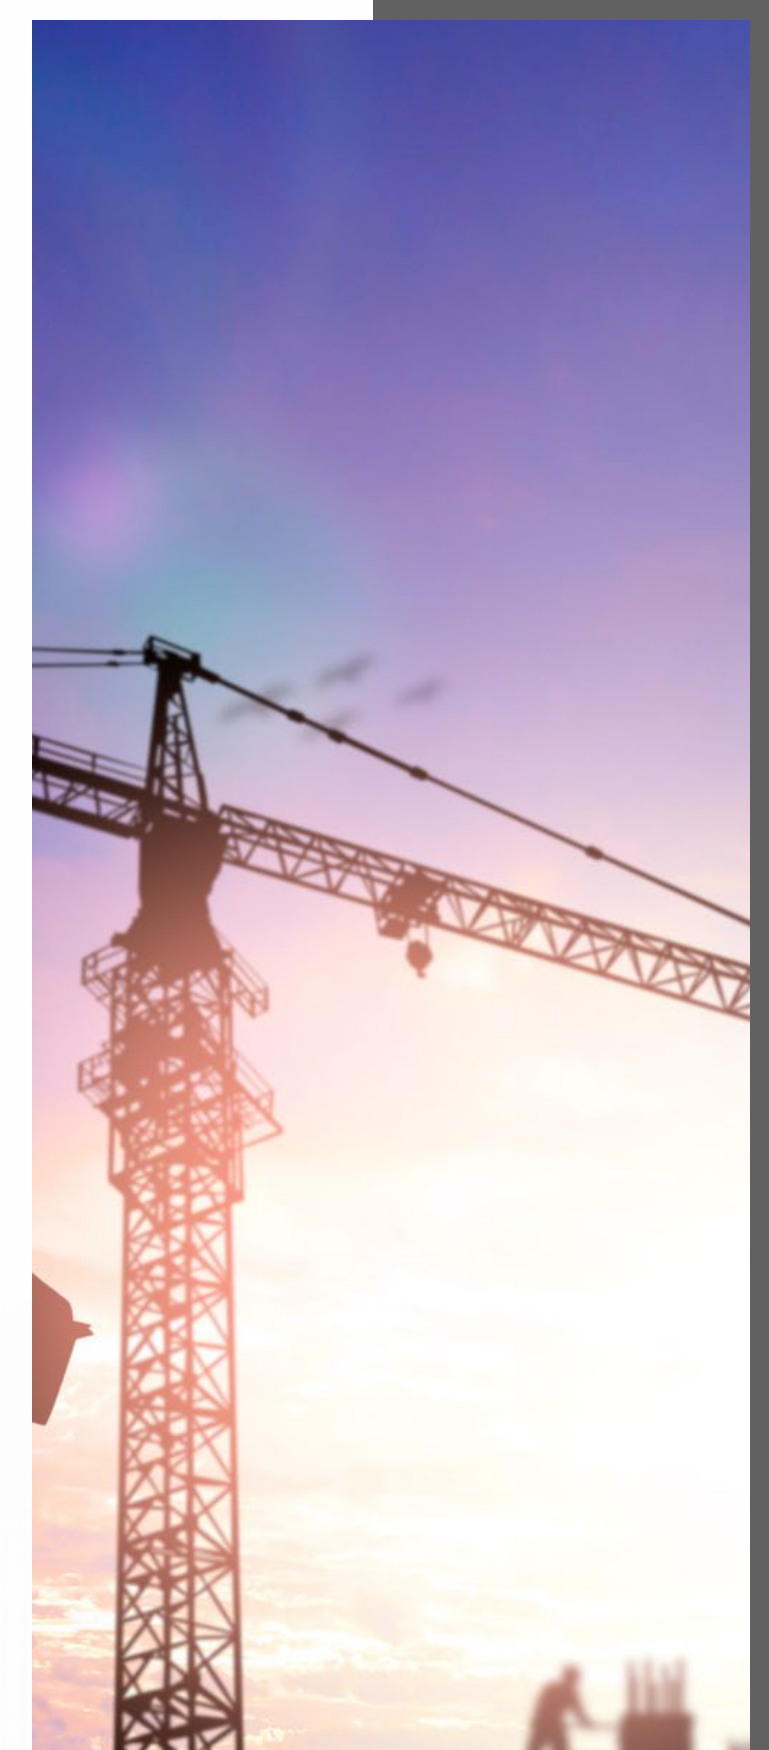

Moreover, we are satisfied with the method of statement and standard of work done at site & comply with the specification of work.

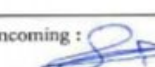

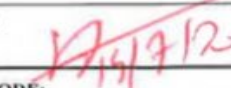

We wish them all success in future.

Thank you and best regards,

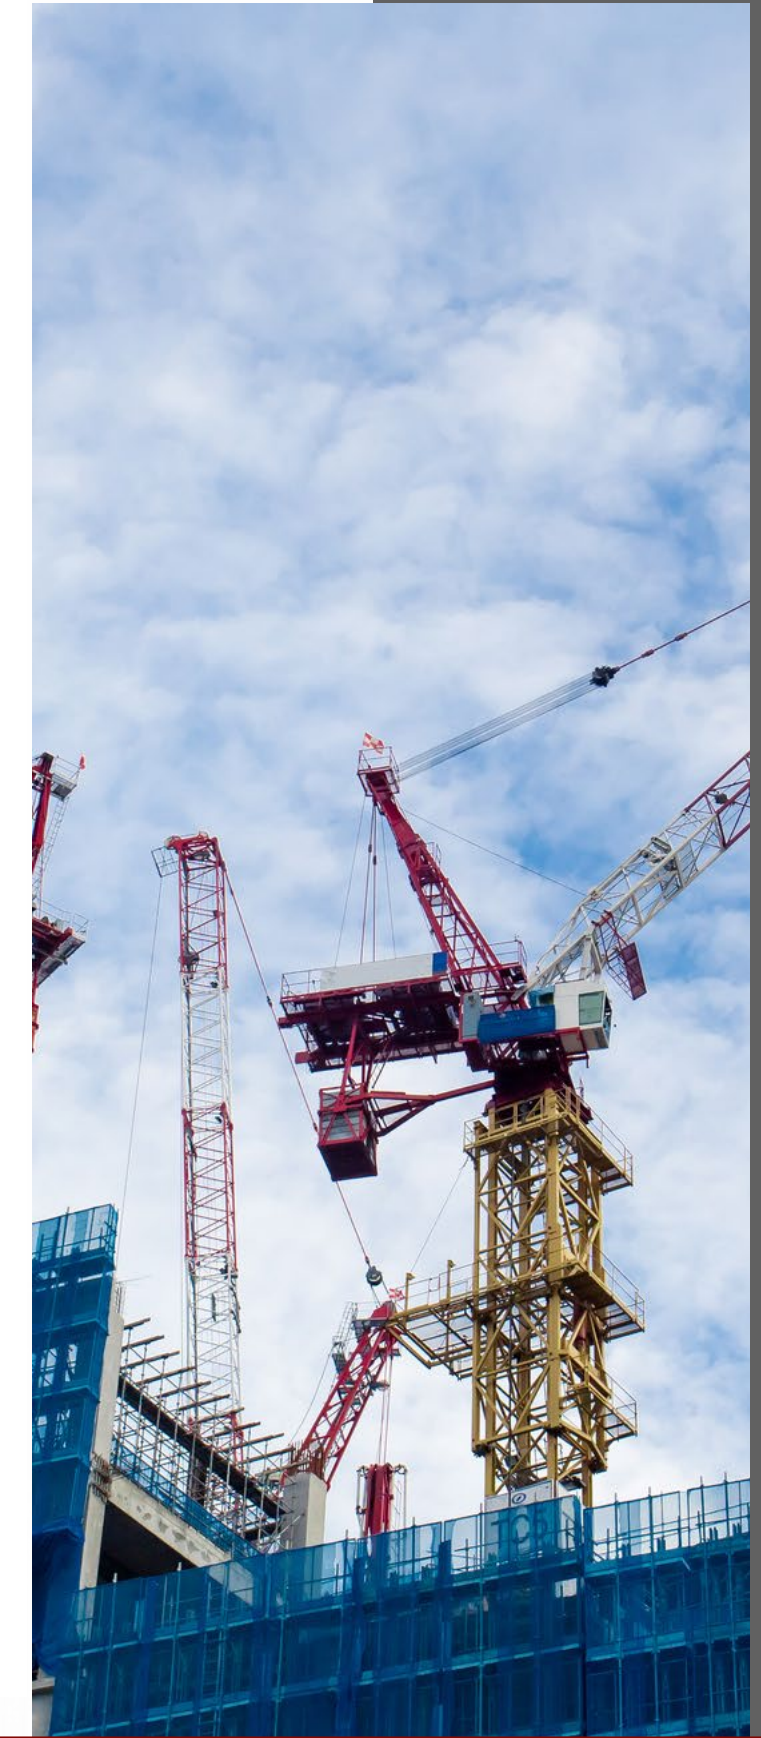

Eng. Nicolas Haddad
 SCC Project Manager
 Centro Riyadh Hotel project.

CERTIFICATE

FOR RECOMMENDED SIKA APPLICATORS

This is to certify that

GULF CRETE CONTRACTING

Has successfully executed many Projects after having passed the application training of various Sika systems and is Recommended Sika Applicator for

Concrete repair and protection, Waterproofing (PVC membranes loose laid and full compartment system), Cementitious, Resins, Combiflex range), Joint Sealants and Industrial flooring.

This comprehensive training consisted of practical instructions about proper storage, preparation and application of Sika products.

The recommended applicator has been provided with the relevant Sika Product Data Sheets and all other technical documentation.

This confirmation is valid until the date of expiry below and may be renewed subject to the Recommended Applicator successfully completing any training courses required by Sika. The Recommended Applicator is responsible for ensuring full compliance by its employees with Sika's guidelines, training instructions and any other requirements of third parties.

Sika is not responsible for any loss or damage suffered by any third party as a result of any acts or omissions of the Recommended Applicator arising in anyway, including but not limited to breach of contract, misrepresentation, failure to comply with applicable laws or any other tort including negligence.

Sika Saudi Arabia,

Issuing Date: January 01, 2016

Expiry Date: December 31, 2016

Shehadeh Salman
T.M Waterproofing Manager
Central Region
Sika Saudi Arabia

Emad Al Asqar
Sr. Sales Manager
Central Region
Sika Saudi Arabia

This Recommendation does not assume responsibility for the correct storage, mixing or use of these Products. Sika shall not be liable for damage to persons or property, loss of business or profit or any other direct, indirect, incidental, special or consequential damage or caused by the Recommended Applicator. Sika shall also not be responsible for use of these Products in a manner to infringe on any patent or other intellectual property rights held by others. Sika's liability is limited to the quality only of the supplied material. Any failures due to wrong application or storage not in accordance with the given guidelines as stated on the latest Technical Data Sheets, as well as structural or mechanical failures are excluded herein.

SWCC

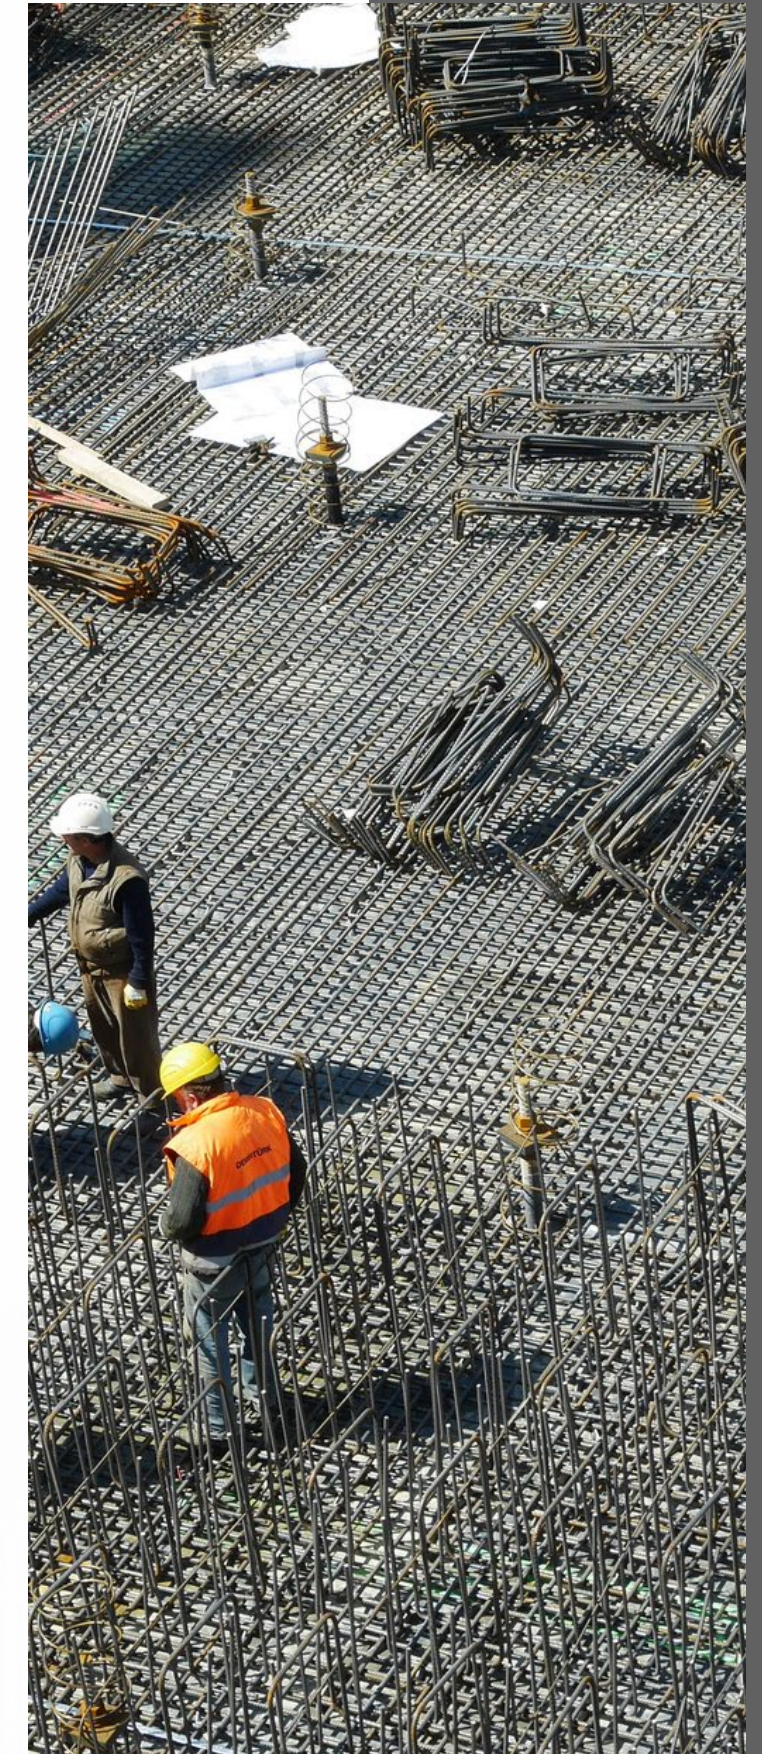

Hello ShahRukh Ali,

SWCC has approved the updates to SWCC - Supplier registration questionnaire that Alwaleed A. Al-Muhanna submitted on Wed, 04 Aug, 2021.

Best Regards,

SAP Ariba team

You are receiving this email because your customer, SWCC, has identified you as the appropriate contact for this correspondence. If you are not the correct contact, please contact SWCC.

TRAINING CERTIFICATION

hereby confirms the company

Construction, Maintenance & Restoration
للانشاءات و الصيانه

based in Riyadh, Saudi Arabia is a Certified Applicator of Waterproofing,
Repair, and Protection System,

that has successfully completed the theoretical and technical training to
apply the Penetron Crystalline Growth Waterproofing Systems:

**PENETRON, PENETRON ADMIX, PENEKRETE MORTAR, PENEPLUG,
PENEBAR, PENESEAL, & PENETRON INJECT**

This Certificate No. PEN/ME/CERT-020 is given on 28th NOVEMBER 2022
valid until 27th NOVEMBER 2023.

Sam Annous
Managing Director – GCC

CERTIFICATE

FOR RECOMMENDED SIKA APPLICATORS

This is to certify that key people of the company
GULF CRETE CONTRACTING

successfully passed the applications training of the following Sika Products and is Recommended Sika Applicator:

SARNAFIL MECHANICALLY FASTENED & FULLY ADHERED SYSTEMS ,SIKAPLAN WATERPROOFING SYSTEM

This comprehensive training consisted of practical instructions about proper storage, preparation and application of Sika products.

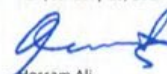

The recommended applicator has been provided with the relevant Sika Product Data Sheets and all other technical documentation.

This confirmation is valid until the date of expiry below and may be renewed subject to the Recommended Applicator successfully completing any training courses required by Sika. The Recommended Applicator is responsible for ensuring full compliance by its employees with Sika's guidelines, training instructions and any other requirements of third parties.

Sika is not responsible for any loss or damage suffered by any third party as a result of any acts or omissions of the Recommended Applicator arising in anyway, including but not limited to breach of contract, misrepresentation, failure to comply with applicable laws or any other tort including negligence.

KSA, January 18, 2017

Expiry Date: 31 December 2017

Hossam Ali
Technical & Specifications Manager KSA

Stevan Zivkovic
General Manager-Sika Saudi Arabia Co. Ltd

This Recommendation does not assume responsibility for the correct storage, mixing or use of these Products. Sika shall not be liable for damage to persons or property, loss of business or profit or any other direct, indirect, incidental, special or consequential damage or caused by the Recommended Applicator. Sika shall also not be responsible for use of these Products in a manner to infringe on any patent or other intellectual property rights held by others. Sika's liability is limited to the quality only of the supplied material. Any failures due to wrong application or storage not in accordance with the given guidelines as stated on the latest Technical Data Sheets, as well as structural or mechanical failures are excluded herein.

CERTIFICATE

FOR PROVISIONAL SIKA APPLICATORS

This is to certify that key people of the company

GULF CRETE CO.

successfully passed the applications training of the following Sika Products and is Provisional Sika Applicator:

**SIKACRETE,SIKAGROUT, SIKAFLOOR 263SL
SIKAFLOOR 264**

This comprehensive training consisted of practical instructions about proper storage, preparation and application of Sika products.

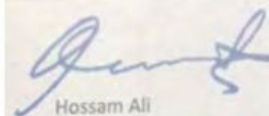

The Provisional applicator has been provided with the relevant Sika Product Data Sheets and all other technical documentation.

This confirmation is valid until the date of expiry below and may be renewed subject to the Provisional Applicator successfully completing any training courses required by Sika. The Provisional Applicator is responsible for ensuring full compliance by its employees with Sika's guidelines, training instructions and any other requirements of third parties.

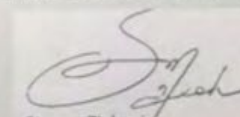

Sika is not responsible for any loss or damage suffered by any third party as a result of any acts or omissions of the Provisional Applicator arising in anyway, including but not limited to breach of contract, misrepresentation, failure to comply with applicable laws or any other tort including negligence.

KSA, January 22, 2017

Expiry Date: December 31,2017

This Recommendation does not assume responsibility for the correct storage, mixing or use of these Products. Sika shall not be liable for damage to persons or property, loss of business or profit or any other direct, indirect, incidental, special or consequential damage or caused by the PROVISIONAL Applicator. Sika shall also not be responsible for use of these Products in a manner to infringe on any patent or other intellectual property rights held by others. Sika's liability is limited to the quality only of the supplied material. Any failures due to wrong application or storage not in accordance with the given guidelines as stated on the latest Technical Data Sheets, as well as structural or mechanical failures are excluded herein.

CERTIFICATE

SIKA CARBODUR® S & SIKAWRAP® RANGE TRAINING ATTENDANCY

This is to certify that

**MR.ABDALLAH MOHD RASMI A ALKOUSA
OSMAN OMER OSMAN SALIH
AURANGZAIB SARWAR SARWAR YAR KHAN
AURANGZAIB SARWAR SARWAR YAR KHAN
MUHAMMAD JAMAL ZAIB AURANGZAIB SARWAR
JAWAID IQBAL KHAN
ASIF SHER AFSAR SHER**

Successfully passed the

INSTALLATION OF SIKA CARBODUR S AND SIKAWRAP RANGE

This comprehensive training consisted of presentations and workshops which included the following:

- Systems Description and components.
- Equipment Tools.
- Appliances & Components and general application guides
- On-site Checklist for Equipment and Materials

This training was conducted by Sika KSA LLC in May 9th 2017 Sika Saudi Arabia Co. Ltd.

CERTIFICATION

CERTIFICATE

FOR PROVISIONAL SIKA APPLICATORS

This is to certify that key people of the company

CONCRETE GULF LIMITED(GULF CRETE).

Successfully passed the applications training of the following Sika Products and is Provisional Sika Applicator:

SIKA CARBODUR® S & SIKAWRAP® RANGE

This comprehensive training consisted of practical instructions about proper storage, preparation and application of Sika products.

The Provisional applicator has been provided with the relevant Sika Product Data Sheets and all other technical documentation.

This confirmation is valid until the date of expiry below and may be renewed subject to the Provisional Applicator successfully completing any training courses required by Sika. The Provisional Applicator is responsible for ensuring full compliance by its employees with Sika's guidelines, training instructions and any other requirements of third parties.

Sika is not responsible for any loss or damage suffered by any third party as a result of any acts or omissions of the Provisional Applicator arising in anyway, including but not limited to breach of contract, misrepresentation, failure to comply with applicable laws or any other tort including negligence.

CERTIFICATE OF ATTENDANCE

Subject : MasterSeal[®] 550SA Application Training Attendance Certificate

This is to certify that M/S Gulf Create had gone through a successful application training of MasterSeal[®] 550SA in Riyadh Metro Project in Riyadh by Saudi BASF.

The twelve (12) employees who attended the training and whose names appear below (Iqama copy attached) had shown good quality work. Hence they are provisional prequalified applicators to the Saudi BASF range of products as described above.

SN	Name of Attendee	Iqama / Passport Number
1	Azeem Ahammed	2418854200
2	Muhammed Shahzad	2391160047
3	Soharab Ali	2418854390
4	Muhammed Rizwam	2430976684
5	Sanawar Mahmood	2380790820
6	Jayed Muhammed	2413097334
7	Muhammed Shoaib	2402790295
8	Asif Sher	2290222997

CONDITION ASSESSMENT & INSPECTION SERVICES

Our
Services

The degradation of reinforced concrete material is a big challenge for owners who need to keep ageing structures in service and extend their life. RC condition assessment is a powerful decision-making process for engineers responsible for these types of structures. Exposure of these structures and reinforcing steel corrosion are well-known factors in the degradation of concrete civil engineering works, but it is difficult to quantify via conventional inspection methods (visual inspection and hammer sounding).

In fact, it is essential that during every condition assessment, a further step be taken towards understanding the in-depth anomalies in concrete and steel. Accordingly we state-of-the-art non-destructive testing Live instruments can be used to help conclude overall structural condition.

NON-DESTRUCTIVE TESTING

PROFOMETER

The all-in-one solution for rebar assessment and corrosion analysis.

Over view:

Advanced cover meter based on the new generation Profometer touchscreen with universal probe and scan cart. Enhanced correction factor for maximum cover accuracy on congested rebar arrangements. Dedicated functionalities for mapping concrete cover and for reporting one layer rebar arrangements.

PROFOMETER CORROSION

The most advanced corrosion instrument in the market.

Over view:

Advanced half-cell measuring instrument for on-site mapping of the corrosion potential. Dedicated software for assisted measurements with rod and wheel electrodes. Statistical software for immediate data interpretation.

PROCEQ GPR LIVE

The most innovative ultra-wideband portable GPR for concrete testing.

Over view:

The Proceq GPR Live portable ground penetrating radar instrument is the beginning of a new era in NDT. The outstanding, patented ultra-wideband technology combined with a compact wireless probe delivers unmatched industry performance. Just connect to your iPad and detect objects and back walls reliably, with a amazing clarity and ease of use.

PUNDIT LIVE ARRAY

PRO
making pulse echo testing simpler and faster with Artificial Intelligence (A.I.)

Over view:

The Pundit Live Array Pro is a breakthrough in on-site productivity and image clarity for concrete NDT. The rugged, compact, wireless transducer array incorporates cutting-edge multi-channel Ultrasonic Pulse Echo technology.

PUNDIT PL-200

The new Benchmark for Ultrasonic Pulse Velocity Testing

Over view:

The Pundit 200 is a best-in-class UPV test instrument with an extended range of measurement modes. Rugged touchscreen with intuitive user interface for best possible measuring and analysis of the measured data.

ORIGINAL SCHMIDT LIVE

The world's most advanced R-value concrete test hammer

Over view:

The Original Schmidt Live is a uniquely versatile hammer that can be used as stand-alone analog hammer, a stand-alone digital hammer, together with a Bluetooth printer and finally as the world's most advanced R-value concrete test hammer with the Schmidt Live app.

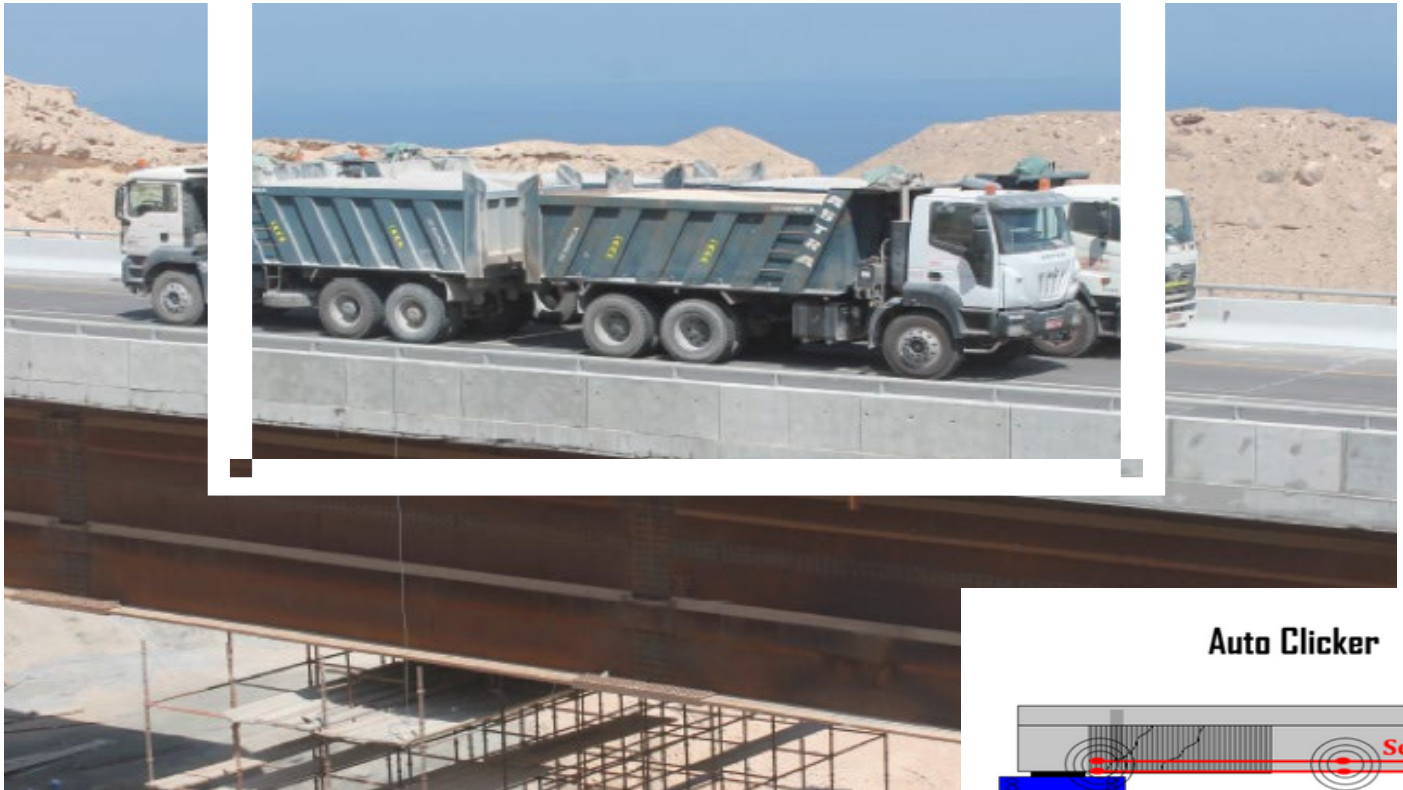

RESIPOD

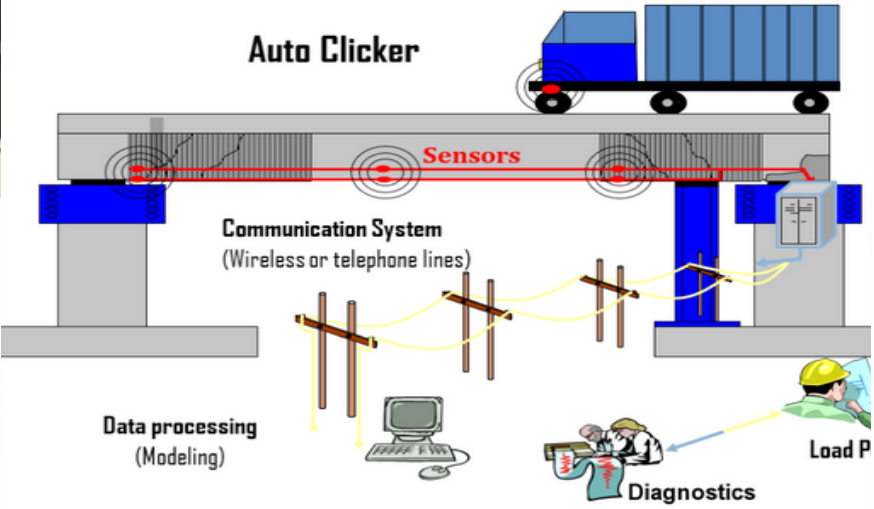

The world's most accurate concrete surface resistivity meter
 Over view :
 A complete solution for measuring the electrical resistivity of concrete both in the laboratory under controlled conditions and on site. Standard fixed spacing surface Wenner probe with variable spacing and bulk resistivity accessories.

BRIDGE LOAD TEST

Bridge load testing is a common structural evaluation technique usually done to measure physical properties of the bridge including deflections, strains, etc (Static and Dynamic load testing)...or to module and give a rating for the structure (through our diagnostic load test). It is usually carried out at the structure's different life phases including construction, maintenance, and repair stages. Structural Testing System (STS) has been designed expressly for performing live-load tests on highway and

railway bridges, piers, and marine loading structures. Developed through the experience of testing more than 300 Structures worldwide (U.S., Asia, Australia, India & Saudi Arabia), the system has been turned to perfection making it one of the most efficient and reliable testing methods in the structural analysis field.

BUILDINGS LOAD TEST

Over view:
Load testing of building components or elements is a popular mean of demonstrating a structure's capabilities when a

Structural strength is unknown.

- Impractical change of use involving an increase in loading
- Bomb or fire damage.
- Materials defect or structural deterioration.

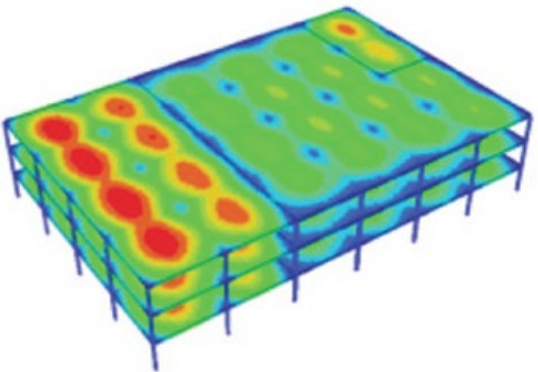

simple analysis is not practical. Typical situation that arise include: Our services are as follows:

- Suspicion in performance such as excessive creep deflection
- Required dimensions and material properties can't be measured or tested.

MEASUREMENTS

A set of response measurements shall be made after each load increment is applied and after the total load has been applied. On the structure for at least 24 hours. Real-time monitoring of deflections and strains is usually undertaken for building load tests using smart sensors installed on the structure to be tested. Those instruments are connected to a data acquisition system which collects.

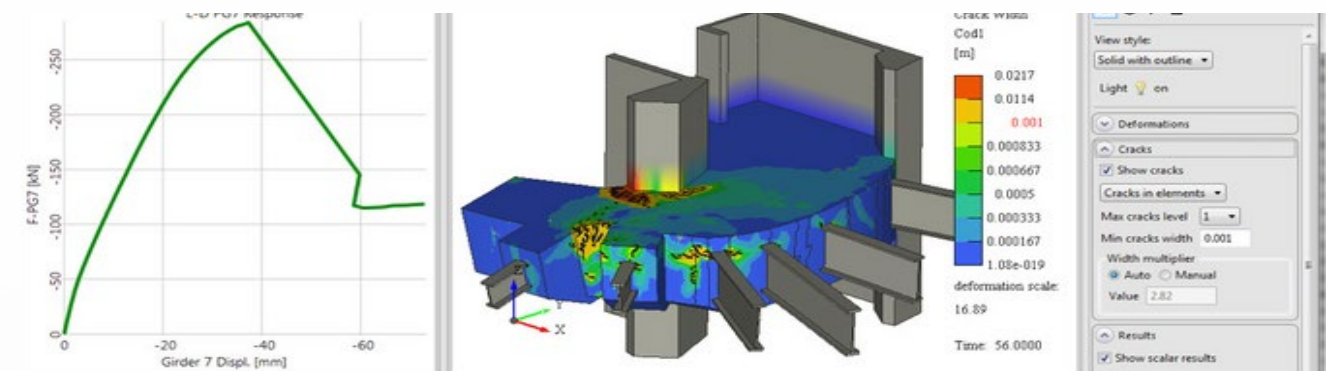

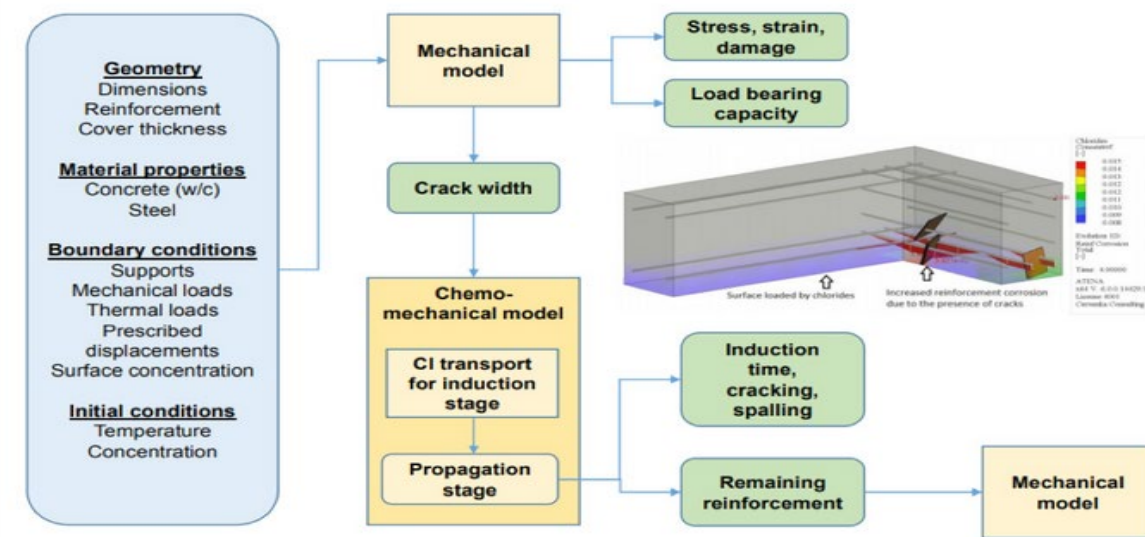

DURABILITY ANALYSIS

With years of experience, Co -mender's Team recognized that the durability of concrete structures is related not only to design and material but also to construction issues. Upon completion of new concrete structures, the achieved construction quality always shows a high scatter and variability, and in severe environments, any weaknesses in the concrete structures will soon be revealed in the final condition of the structure whatever specifications and constituent materials have been applied.

Our Services

In order to better take all this variability into account and to evaluate durability analysis combined with structural analysis software should be applied.

our experts and in collaboration with its local engineers and with the aid of its communication technology can provide its customers with full comprehensive service for better concrete quality and better construction practices in new construction sites and to evaluate remaining life and residual strength in existing structures.

CONCRETE REPAIR

Our Services

Deterioration in concrete is a big challenge and a major concern for structures and utilities owners especially when it reaches an advanced stage and starts causing an increase in shutdown and replacement costs and create a safety hazard for occupants.

with the aid of its advanced technologies, utilizes state-of-the-art materials, repair methods, tools and trained engineers to repair and restore concrete surfaces and structures.

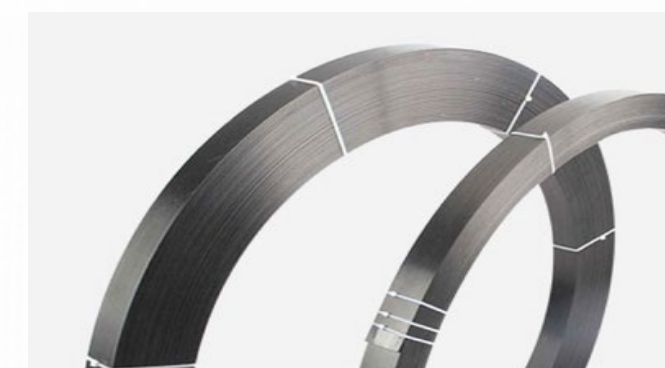

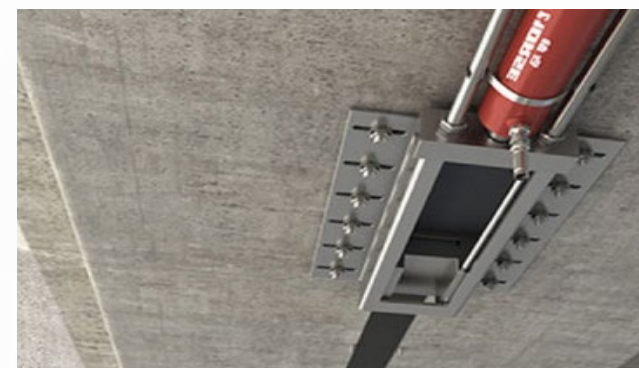

CATHODIC PROTECTION

Our Services

Cathodic protection reduces costs for future repair work construction in contrast to earlier, when cathodic protection and extends the life expectancy of concrete structure. was only used as a method of repair. In both cases, Cathodic Many reinforced concrete structures suffer from premature protection efficiently stops ongoing corrosion and thus degradation, most commonly caused by chlorides. Today, degradation of concrete structure. cathodic protection is used by many building owners as an The system is comprised mainly of anodes, power supply integrated part of the maintenance strategy for reinforced and control units. concrete structures. We provide a full comprehensive service and supply wide range of anodes and equipment for existing Therefore, many reinforced concrete structures are prepared and new structures as well as customized power supplies for installation of cathodic protection a ready during the and control units.

STRUCTURAL STRENGTHENING

Many structures that originally were constructed for a specific use and loading level now are being renovated or upgraded for a different application that may require higher load-carrying capacity. As a result of these higher load demands, existing structures need to be reassessed and may

require strengthening to meet heavier load requirements. Business model is a perfect and highly efficient process that can provide our customers with a comprehensive solution including full Investigate – Design – Supply - Build capabilities.

SOIL INVESTIGATION & REMEDIATION

Our Services

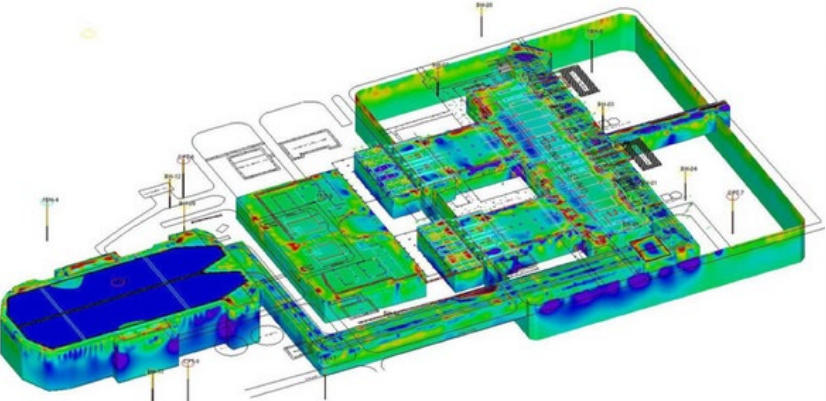

Over the last 20 years, our team has acquired solid experience in soil specialized areas, such as investigations, geotechnical studies and the various engineering phases associated with Solutions development. In the past two years only, the company completed interesting soil investigation and solutions development

for major structures, such as bridges, power plants and buildings. In our approach we use Non-destructive techniques such as ERT (Electrical Resistivity Tomography) and GPR (Ground Penetrating Radar) to better understand the subsurface condition.

Our Services

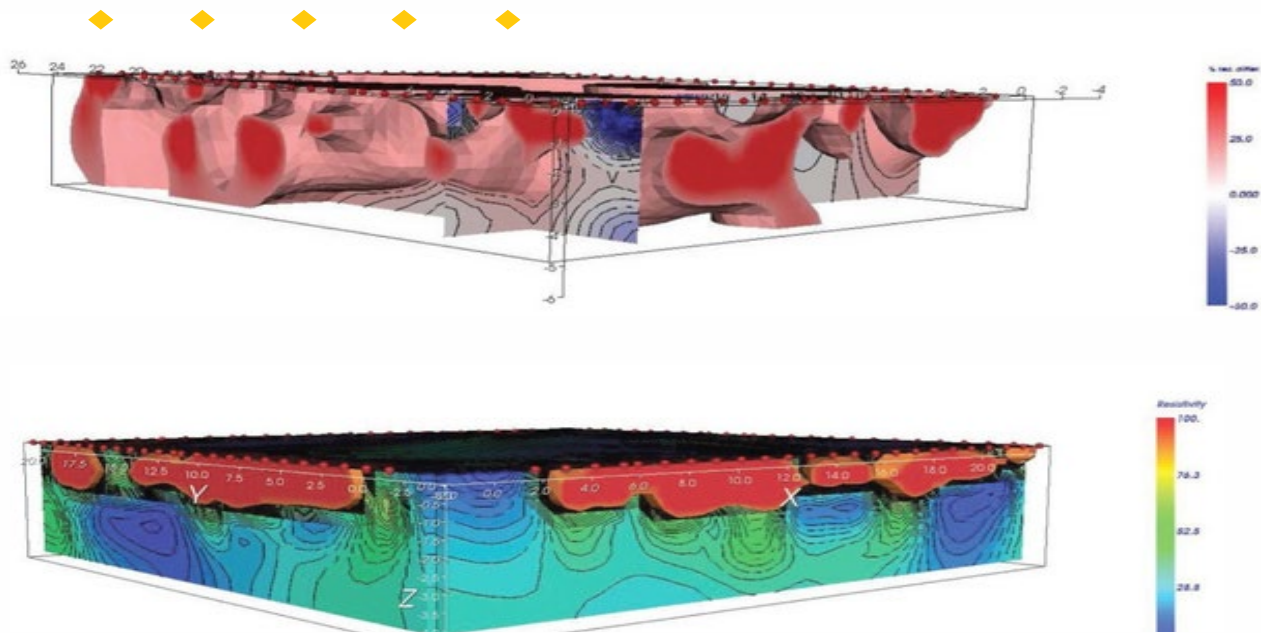

- Soil and geotechnical investigation
- Design of shallow and deep foundations
- Soil improvement and stabilization techniques
- Vibrations monitoring

3D ELECTRIC RESISTIVITY TOMOGRAPHY

Our Services

Characterization of subsurface soil and determination of soil strength are prerequisite for the foundation design of important civil engineering structures. Electrical characterization of soil is done by conducting surface electrical resistivity measurements and subsequently translating these data in terms of electrical properties of subsurface soil. Electric currents are injected into the ground and the resulting potential differences are measured at the surface, yielding information about the distribution of electrical resistivity below the surface. ERT involves repeated current injections through many electrode pair and into the region of interest (the ground) and the

recording of the potential distribution at all other electrodes for each current electrode pair. This procedure generates several electric potential images of the region of interest from different geometries of current injection. Analysis of these images is processed through a forward and an inverse algorithm. This combines all the data to yield 3-D resistivity distribution inside the studied region.

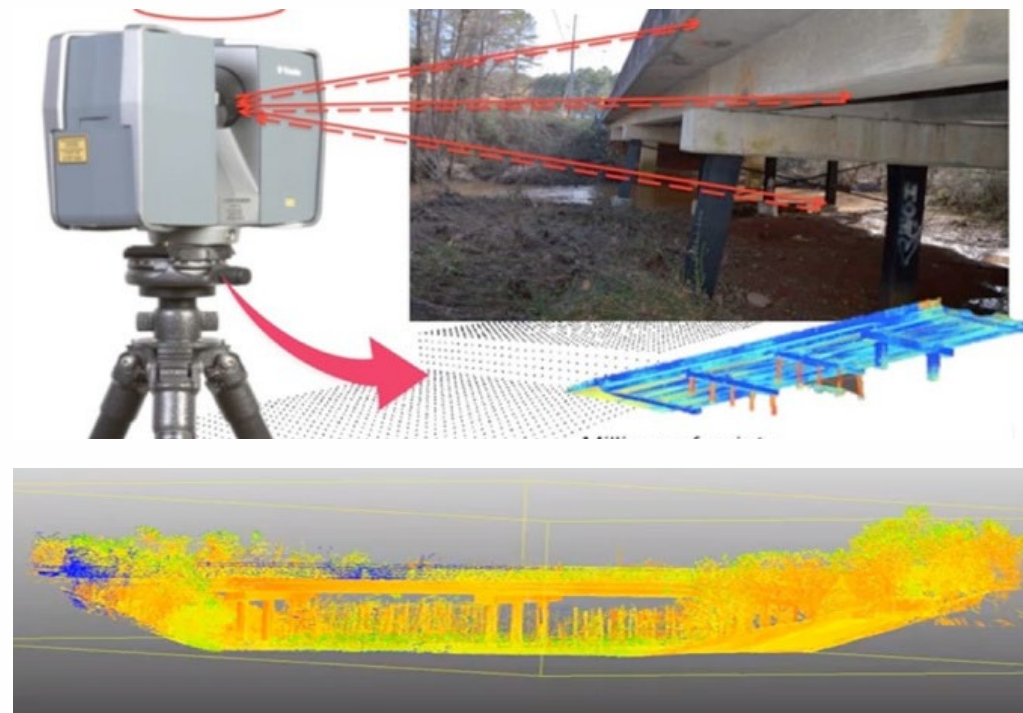

APPLICATIONS

- Determination the location of buried faults
- Detection of voids and cavities in the subsurface Leak
- Detection (water, fuel and others)
- Building Restoration Sites
- Real time monitoring of injection works

ASSET MANAGEMENT SYSTEMS

Our Services

INVENTORY MODULE

We host your existing asset management data online. We perform Initial Inspection to update these data. We Laser scan some/all the structures and develop 3D models. We decompose the 3D model using BIM.

ANALYSIS MODULE

Our experts manage the structures. Analyze the collected data. Conduct Durability Analysis where needed. Prepare routine and detailed Inspection Schedule. Red flag critical structures. Use ComendX to Invite our local Inspectors to conduct the needed Inspection program.

Asset management is the process of making decisions on structure needs and arranging for resulting actions to occur at appropriate times. These may include maintenance, repair, rehabilitation, and replacement actions. Some routine maintenance actions are regularly scheduled, while other maintenance and repair actions are identified through the Department's Asset Inspection and Maintenance (AIM) system. Rehabilitation and replacement strategies are typically determined through an asset assessment that involves varying levels of analysis and engineering. All asset management decisions require inventory and inspection data on the structure to identify needs and appropriate actions. We and through our innovative business model, provides the owner's with the ability to manage their structures and making sure their inspection data are continuously updated without the need to hire a resident full time consulting firm. Our solution is comprised of four modules as follows:

INSPECTION MODULE

Our local Inspectors receive the Inspection Schedule and inspection checklists on our ComendX App. Conduct the needed inspection and/or NDT. Uses ComendAIR AR to assign detected defects into the developed 3D model for the critical structure. Depending on availability, our experts can participate online using ComendAIR or alternatively make a virtual tour in the inspected structure.

REPAIR MODULE

Our experts prepare the Inspection and testing results reports. Preparation of full repair strategy including B.O.Q. Inviting local partners to bid for the developed repair solution.

STRUCTURAL WATERPROOFING-EXISTING STRUCTURES

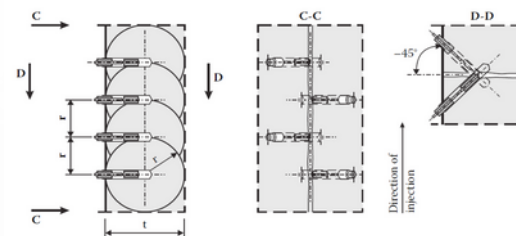

Water can leak into and out of structures. Reasons for this can be cracks, failed joints and even through permeable substrates. Once identified, if not treated, further problems can occur including the corrosion of reinforcement, thus resulting in durability issues and consequential loss of a usable area within the structure.

we collaborates with solutions providers and provides comprehensive solutions for all your basements water leakages and durability issues.

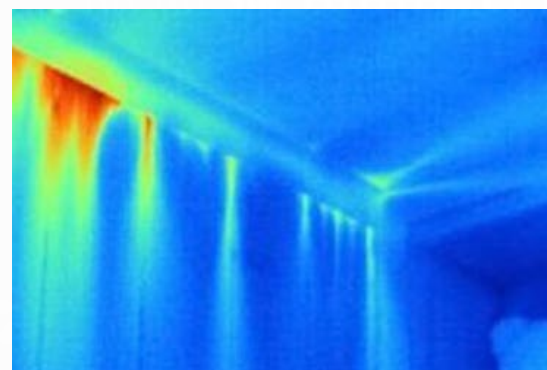

Our
Services

Our services are as follows:

- ◆ Full Condition assessment
- Durability Analysis
- Design of repair and waterproofing solutions
- Supply of materials and Technologies

t: Crack depth
r: Effective radius of a single packer and distance of each packer (max. 60 cm)

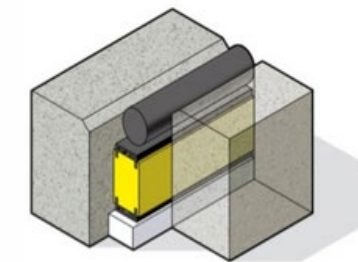

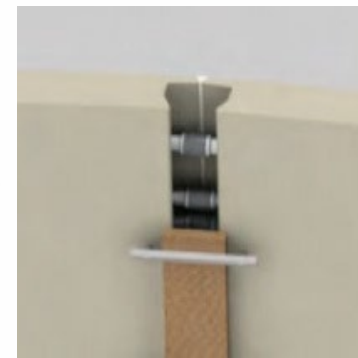

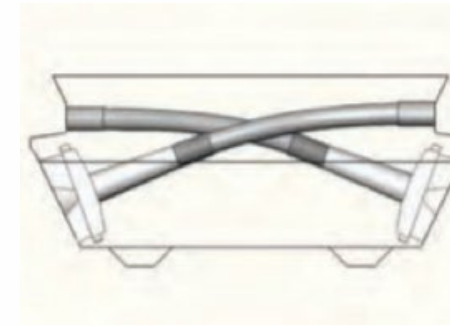

STRUCTURAL WATERPROOFING-NEW CONSTRUCTION

Our Services

ENGINEERING:

Engineering experts collaborate with designers and construction firms throughout all stages of design and construction and provides the following services:

- General advices on the design of underground structures.
- Design the additional post-tensioning system for vertical walls to reduce or eliminate cracking
- Revision and approval of concrete mix design
- Review the reinforcing bars detailing for shrinkage requirements.
- Review the design of the jointing system and introducing cracks inducers if needed
- Construction management including recording of data, photographs and plans for laying all our technologies systems.

WATERPROOF CONCRETE

engineering team reviews the mix design, conducts trial mixes and advises our customers with the use of our crystalline waterproofing admixtures where needed.

Also, we provide, monitoring of the concrete temperature and maturity Experts Supervision of the concrete quality, both on-site during construction and testing in the laboratory using our Co-mendAIR technology.

POST-TENSIONING SYSTEM

and in collaboration with its partner OVM-MENA have developed a special post-tensioning system that can be applied to vertical walls and reduces the amount and width of cracking.

Similarly to post-tensioned water-tanks the cracks in basement walls can be better controlled or even eliminated providing better durability and functionality to the basement spaces.

WATERSTOP

Joints and penetrations are the most critical elements in the below grade waterproofing system.

Special attention is needed in the design phase and construction phase to achieve a sealed joints. Co-mender's joints sealing system is carefully selected for both durability and performance.

TECHNOLOGY

After designing the full waterproofing system and reviewing all its essential components, Co-mender provides its international waterproofing experts live and easy access to the site operations during concrete placement .

It's smart monitoring system and live connectivity with the site team allow the experts to provide their technical advice right on the spot eliminating a lot of possible concrete quality issues at site.
